

K.HARTWALL

Logistics Efficiency through Innovation

A-MATE®

AutoMate your load
carrier movements

A-MATE®

A-MATE® are intelligent mobile robots designed to transport load carriers such as pallets and roll containers in production and logistics environments like warehouses and sorting centers, without the need for an on board operator or driver.

The unique benefits include a compact design and advanced driving system to enable agile movements in tight spaces. Equipped with a powerful electric free lift*, they can pick up and drop off loads both from the floor as well as from shelves and conveyors. A 360 degree scanner coverage ensures maximum safety.

* no scissors below the forks

A-MATE® Counter

MEET THE FAMILY

- Compact design
- Electric free lift
- 360° safety
- Contour-based LiDAR navigation
- Long lasting Li-Ion batteries
- Load carrier detection
- Obstacle detection & avoidance

HALF-EURO-PALLETS

K.HARTWALL ROLL CONTAINERS

COMPATIBLE PRODUCTS

K.HARTWALL LEAN DOLLIES
600 x 400 mm

TAKE ADVANTAGE OF THESE BENEFITS AS WELL

- No adjustment to the load carriers and transfer stations necessary
- Stand-alone or VDA5050-based Fleet Management

WHAT YOU CAN ACHIEVE WITH A-MATE®

Reduce your handling costs

Improve ergonomics and
Health & Safety

Ensure interoperability with
other systems

Fast and safe integration into
your IT environment

Plug, Connect & Produce to
reduce your project lead time

The **implementation of A-MATE®** in your operation increases the digitalization of your workflows and transparency of your processes.

This increases the flexibility and competitiveness of your production environment.

- Increase scalability
- Facilitate rapid process modifications
- Utilize existing capacities and resources
- Track your load carriers systematically
- Minimize disruptions

SHAPE THE FUTURE WITH A-MATE®
AND GAIN A COMPETITIVE EDGE

ELECTRIC FREE LIFT

A-MATE® is a perfectly fitting solution for multiple use cases as it can both handle loads on the floor as well as deliver to or pick up from conveyor belts and shelves.

COMPACT DESIGN

The advanced driving system combined with a compact design enables A-MATE® to move very efficiently in narrow and tight environments.

VERSATILITY

A-MATE® transports various types of load carriers, for example pallets, foldable cages, roll containers and dollies, in different sizes, empty or full.

This makes our AGVs a universal solution for a wide range of intralogistic process flows in manufacturing, warehousing and sorting operations for various industries.

They are designed to operate in demanding industrial environments with heavy traffic and rough conditions.
